and virtually  
maintenance  
free!

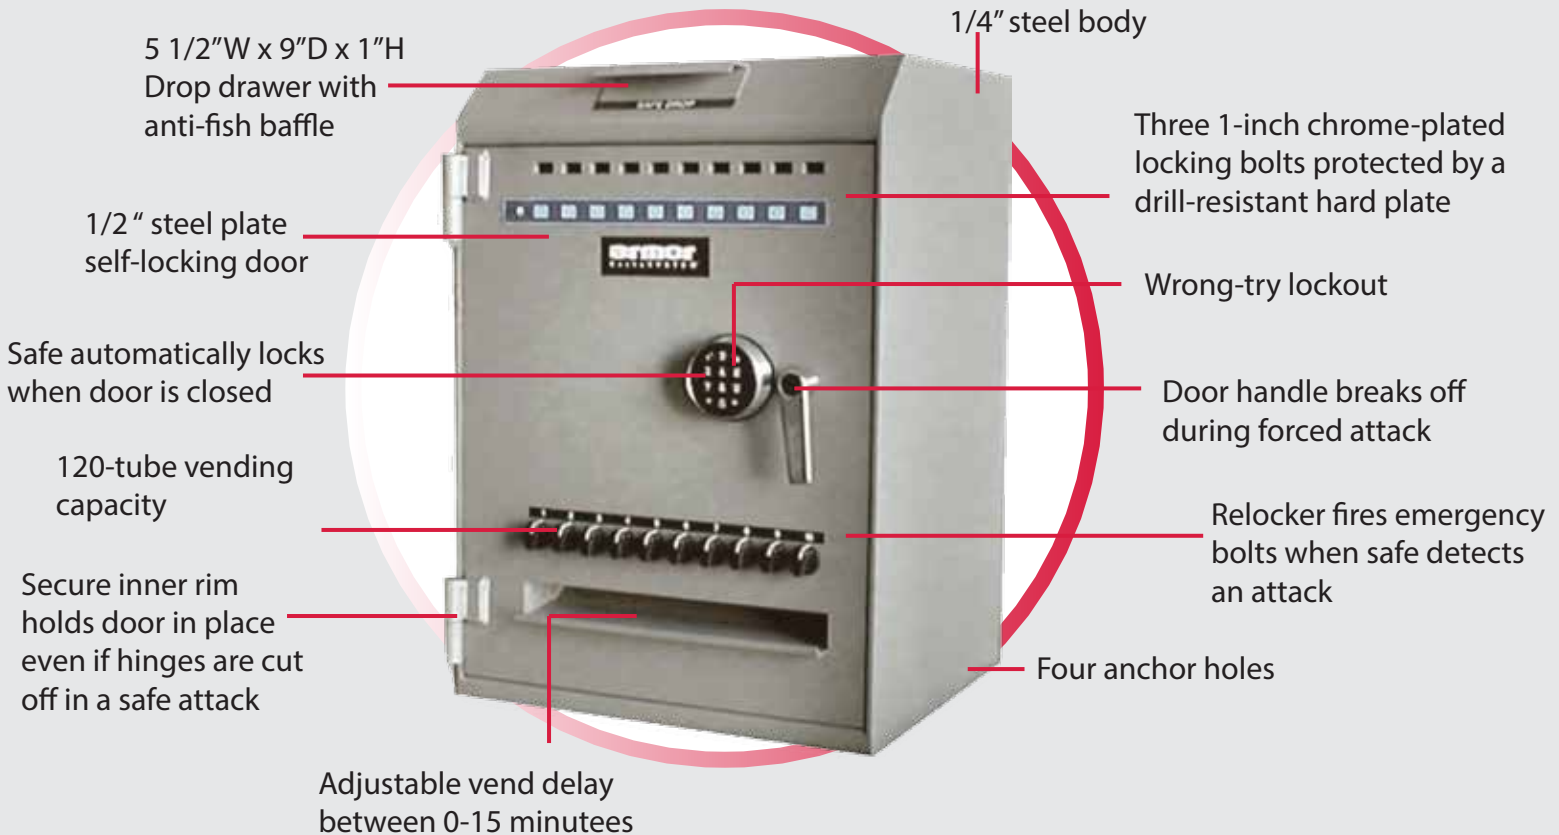

Visible change  
tube loading

User-determined  
change  
denominations

- ✔ Collect and Secure Cash
- ✔ Dispense Change
- ✔ Save Time

# CacheSystem 3400

## *Collect and Secure Cash*

The CacheSystem's rigorous standards protect each point of access and reduce the risk of robbery. Funds can be secured with single or dual combinations and an additional padlock may be applied in situations of heightened risk.

## *Dispense Change*

The inner view provides a visual count of your change fund, eliminating the need for a dipstick or physical count, and the vending magazine can be easily accessed to reposition askew vending tubes. The time-delay feature provides convenience and security with immediate access to the first tube and a programmable delay of up to 15 minutes for subsequent tubes.

## *Flexibility and Scalability*

The CacheSystem 3400 can be connected to any CacheSystem control unit within a distance of 4000 ft. All remote information is reconciled in the main unit.

## *Save Time*

The CacheSystem3400 change fund tubes can be manually loaded and adjusted, reducing the need for maintenance calls. Easy-loading and auditing will save time and increase productivity.

## *Training and Support*

Safes includes a thorough user manual and a "Quick ReferenceGuide" to get you started. Individual or group training classes are available. Every customer receives free 24/7 phone support for the lifetime of their safe.

## *Warranty*

Each safe purchase is accompanied by a standard one-year parts and labor warranty. Premium and extended warranties are also available.

## Optional Features

- Dual combination
- Extended warranty
- Individual or group product training
